

F5®

*The next generation
in Roman roof tiles*

F5®

*The next generation
in Roman roof tiles*

**A roof tile for a factory
and a factory for a roof tile.**

Combining innovative processes with the most sophisticated technology, F5 was created to optimize a new factory entirely designed for its production.

**An exceptional performance with a
very competitive positioning in
the Premium segment.**

Pressed in plaster molds and fired on individual refractory supports, F5 is the product of a thorough design study, resulting in a new model that keeps the authenticity of the roman tile and is adaptable to all international markets.

An eco-efficient roof tile:

- ▶ Reduced CO₂ emissions into the atmosphere;
- ▶ More roof tiles per pallet;
- ▶ Less wood and plastic packaging;
- ▶ Lower cost of transportation;
- ▶ Easier management of pallets in storage and at the construction site.

Roof tile dimensions (approx.)	44.4 x 26.2 cm
Roof tile weight (approx.)	3.6 kg
Roof tiles per m ² (approx.)	12
